DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 13, drawn to a layered polycrystalline structure, classified in class 428, subclass 694TS.
 - II. Claims 7-12 and 14-20, drawn to a method for making a layered polycrystalline structure, classified in class 427, subclass 130.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product could be made by another and materially different process, such as forming a seed layer having a first concentration of a non-magnetic element on a substrate, forming a non-magnetic crystal layer on the seed layer, wherein the non-magnetic crystal layer has a second concentration of a non-magnetic element smaller than the first concentration of a non-magnetic element, and forming magnetic crystal layer on the non-magnetic crystal layer, whereby the magnetic crystal layer is formed by co-depositing a magnetic material with a non-magnetic element via chemical vapor deposition, such that the magnetic crystal layer contains a non-magnetic element along the grain boundary.

Art Unit: 1773

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Patrick Burns on 10/02/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nikolas J. Uhlir whose telephone number is 703-305-0179. The examiner can normally be reached on Mon-Fri 7:30 am - 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Thibodeau can be reached on 703-308-2367. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.
